INTERVIEW DETAILS OF UNITED TECHNOLOGIES COMPANY

The placement at UTC starts with a written test which includes separate-separate questions for Computer Science stream, Electronics stream and mechanical stream. Apart from this, there are two different section for the electronics stream, one is Core Electronics and the other is the Embedded based questions.

(A) Written Test-

(i) Technical Questions-

Different technical questions are asked to the candidate based on the following topics-

1. C Programming Questions
2. Microprocessors
3. Operating Systems
4. Data Structure
5. Softwares etc.

(ii) Aptitude Questions-

Second Part in the written round of the UTC is the Aptitude Test. This section consists of 30 questions which the candidates need to solve within time duration of 30 minutes only. The aptitude questions are basically from the topics like-

1. Time and Distance
2. Simple Interest and Compound Interest
3. Boats and Streams
4. Pipes and Cisterns
5. Time and Work etc.

(iii) Apart from these two, there will be some logical and data interpretation questions around 30 questions in this section with a time allotted of 30 minutes.

(B) The next round after qualifying the written test is the Group Discussion Round and after qualifying this round, the candidate is then called for the final HR Round.

The interview questions that are asked in the final HR Round are simple. Let's have a look at what questions are asked-

1. Describe myself and what I was working in last 5-6 years.

2. Ask me why I want to work for UTC.

3. Describe a Damage Tolerance analysis (generally speaking).
