### **1. Computer:**

Computer is the wonderful invention of the modern life. A computer is a general purpose device that can be programmed to carry out a finite set of arithmetic or logical operations. Since a sequence of operations can be readily changed, the computer can solve more than one kind of problem. With the help of the computer we bring the world in our grip. Computer consists of at least one processing element, typically a central processing unit (CPU) and some form of memory. The processing element carries out arithmetic and logic operations, and a sequencing and control unit that can change the order of operations based on stored information. Peripheral devices allow information to be retrieved from an external source, and the result of operations saved and retrieved. Now we do all work with computer. We get enjoyment with computer. We can hear songs in computer. So, computer is the important thing in our today life.

### **2. Story:**

Once upon a time there was a farmer. He was very unhappy. Because he had three sons. But they were quarreling with each other. One day farmer called his sons and gave them a bundle of sticks and said them to break the sticks. They all tried but they all failed then the farmer gave them a single stick to all of them and that time they broke the stick easily. After this the sons learnt that if they united with them then nothing will break their unity.
