

Ethical Hacking Tricks

Ethical Hacker:

A person who is trusted by the organization with their personal and confidential data though criticized by few is an [Ethical hacker](#). The job this fellow is assigned is to purposely and with permission hack into the organizations website and find the loop holes in the [web security](#) of the company. This, the company does to protect its confidential files from the access of other people or intentional black hat hackers out there. They are people who will hack

your [official website](#) or try to get into your mainframe to get access to confidential files and then sell them to your competitors for a hefty sum of money. Thus, the need of Ethical hackers have sprung in the world today. Although the demand has sprung up then also the no of Ethical hackers available are low. These are mainly because still now people don't see it as a [good profession](#) to choose as they will have to face criticism and also because the course is a hefty one and a tuff exam to pass. But if you get through the exam once, there is a bright future waiting for you ahead of yourself. As, due to the trust factors the organizations pay the Ethical hackers a hefty sum of money.

Sometimes to bring interest into a subjects some practical help is advisable, thus here are some [Ethical hacking tricks](#) for you all.

Ethical hacking tricks to hack the Gmail:

Now as you know Gmail is the largest and most frequently used web Email service now a days. So, it would be exciting to hack the Gmail.

So, if you are curious to know how to do it, this article will help you with the Ethical hacking tricks.

There are some scams and myths about the hacking of Gmail: They are that some websites will address you to download something called Gmail hacking software. But be clear that their is actually no such software to hack Gmail in one click its a scam.

We would not want you to download a software rather we try to introduce to you the latest Ethical hacking tricks to hack gmail:

1. Keylogging

2. Phishing

Now, Among the above two ways the easier way is through Keylogging. This is done with the help of a small software called the keylogger. This software once installed in any computer. This will capture all the key strokes made by the user. The main feature of it is that it works in complete stealth mode by completely hiding itself. This, is thus the most easy way. Once you install in the PC you want to hack and once the user types his or her gmail username and password they will be stored and send to you through the email facility. thus you can hack. now, if you don't have access to the PC physically then also you can do it as some keyloggers available can be installed remotely also. This is one of the best ethical hacking tricks.

Another method is phishing. In this method a fake login page is created. This is today the most widely used hacking technique. In this as soon as you login the information is send to the web server and you loose it.

Hack a facebook account:

Before hacking you should know that facebook has introduced a new method of password recovery using the feedback by 3 trusted freinds. But the hackers have reversed that logic into a way of hacking. Let us discuss the Ethical hacking tips:

1. Step 1: You need to have 3 fake facebook accounts. Then you need to add them to the friend list of the account you want to hack.
2. Step 2: Now you need to go to the login of facebook and click on forgot password.
3. Add your friends email address in the Email section. And then yours friends name and your name in the section below.

4. Now if the above step is done correctly you could see the profile pic of the friend whose profile is going to be hacked.

5. Click on NO LONGER HAVE ACCESS TO THESE.

6. Then you can give a new Email address of your choice are which you have used with the Facebook account earlier. Then press submit.

7. Once asked the security question if you know it, then well and good. Else give wrong answer 3 times. Then you will be asked for 3 trusted friends.

8. Give the name of your created profiles. Ethical hacking Tips.

9. Then log on to each profile carefully and check the notification. click on OK and authorize it.

10. Once you have authorized it you can easily get access to the profile.

And now the mail will reach you and you have successfully hacked the facebook account of your friend. This is considered to be a major loop hole in the security if facebook and needs to dealt with.
